Probity Medical Transcription Selected As Top 50 Fastest Growing Company

Probity Medical Transcription, a provider of medical transcription and document management services, was recently honored as one of the Top 50 Fastest Growing Companies by the *Central Penn Business Journal*. Probity Medical Transcription was ranked 20th among the companies that were selected for the 2008 list of businesses that have made significant growth over a three-year period.

In order to be eligible for nomination, companies needed to meet minimum revenue levels for each fiscal year. Growth was then measured over a three-year period and companies were then ranked according to revenue growth with consideration given to both dollar amount and percentage increases.

David A. Plummer, Probity's CEO, credits the company's success and national presence on their ability to grow from a base of established regional clients and expand into serving larger clients across the United States. Founded in 2004, Probity now employs approximately 150 workers and is experiencing continued nationwide growth. "Our employees are committed to providing the highest levels of client service and their dedication has helped us exceed our goals," Plummer added.

Probity Medical Transcription employs a pool of U.S. based medical transcriptionists in 38 states, utilizing a robust internet-based transcription platform. This integrated system provides consistency, reliability and ease of use for physicians and medical staff. Probity works with healthcare systems, acute care hospitals, multi-specialty clinics and physician groups in over 30 states. For more information on Probity's services, visit www.ProbityMT.com
